

TABLEAU VISUALISATION OF DATABASE

BY:ANN LIN DAMI

DATABASE

THE DATABASE USED FOR VISUALIZATION IS A
“NIKE SALES DATABASE” TAKEN FROM THE
ONLINE WEBSITE KAGGLE.

IT IS A SALES DATASET OF THE BRAND NIKE IN
UNITED STATES OF AMERICA. THE DATASET
CONSISTS OF 9 VARIABLES, INCLUDING TOTAL
SALES, UNITS SOLD, DATE OF PURCHASE,
PRODUCT, STATE ETC.

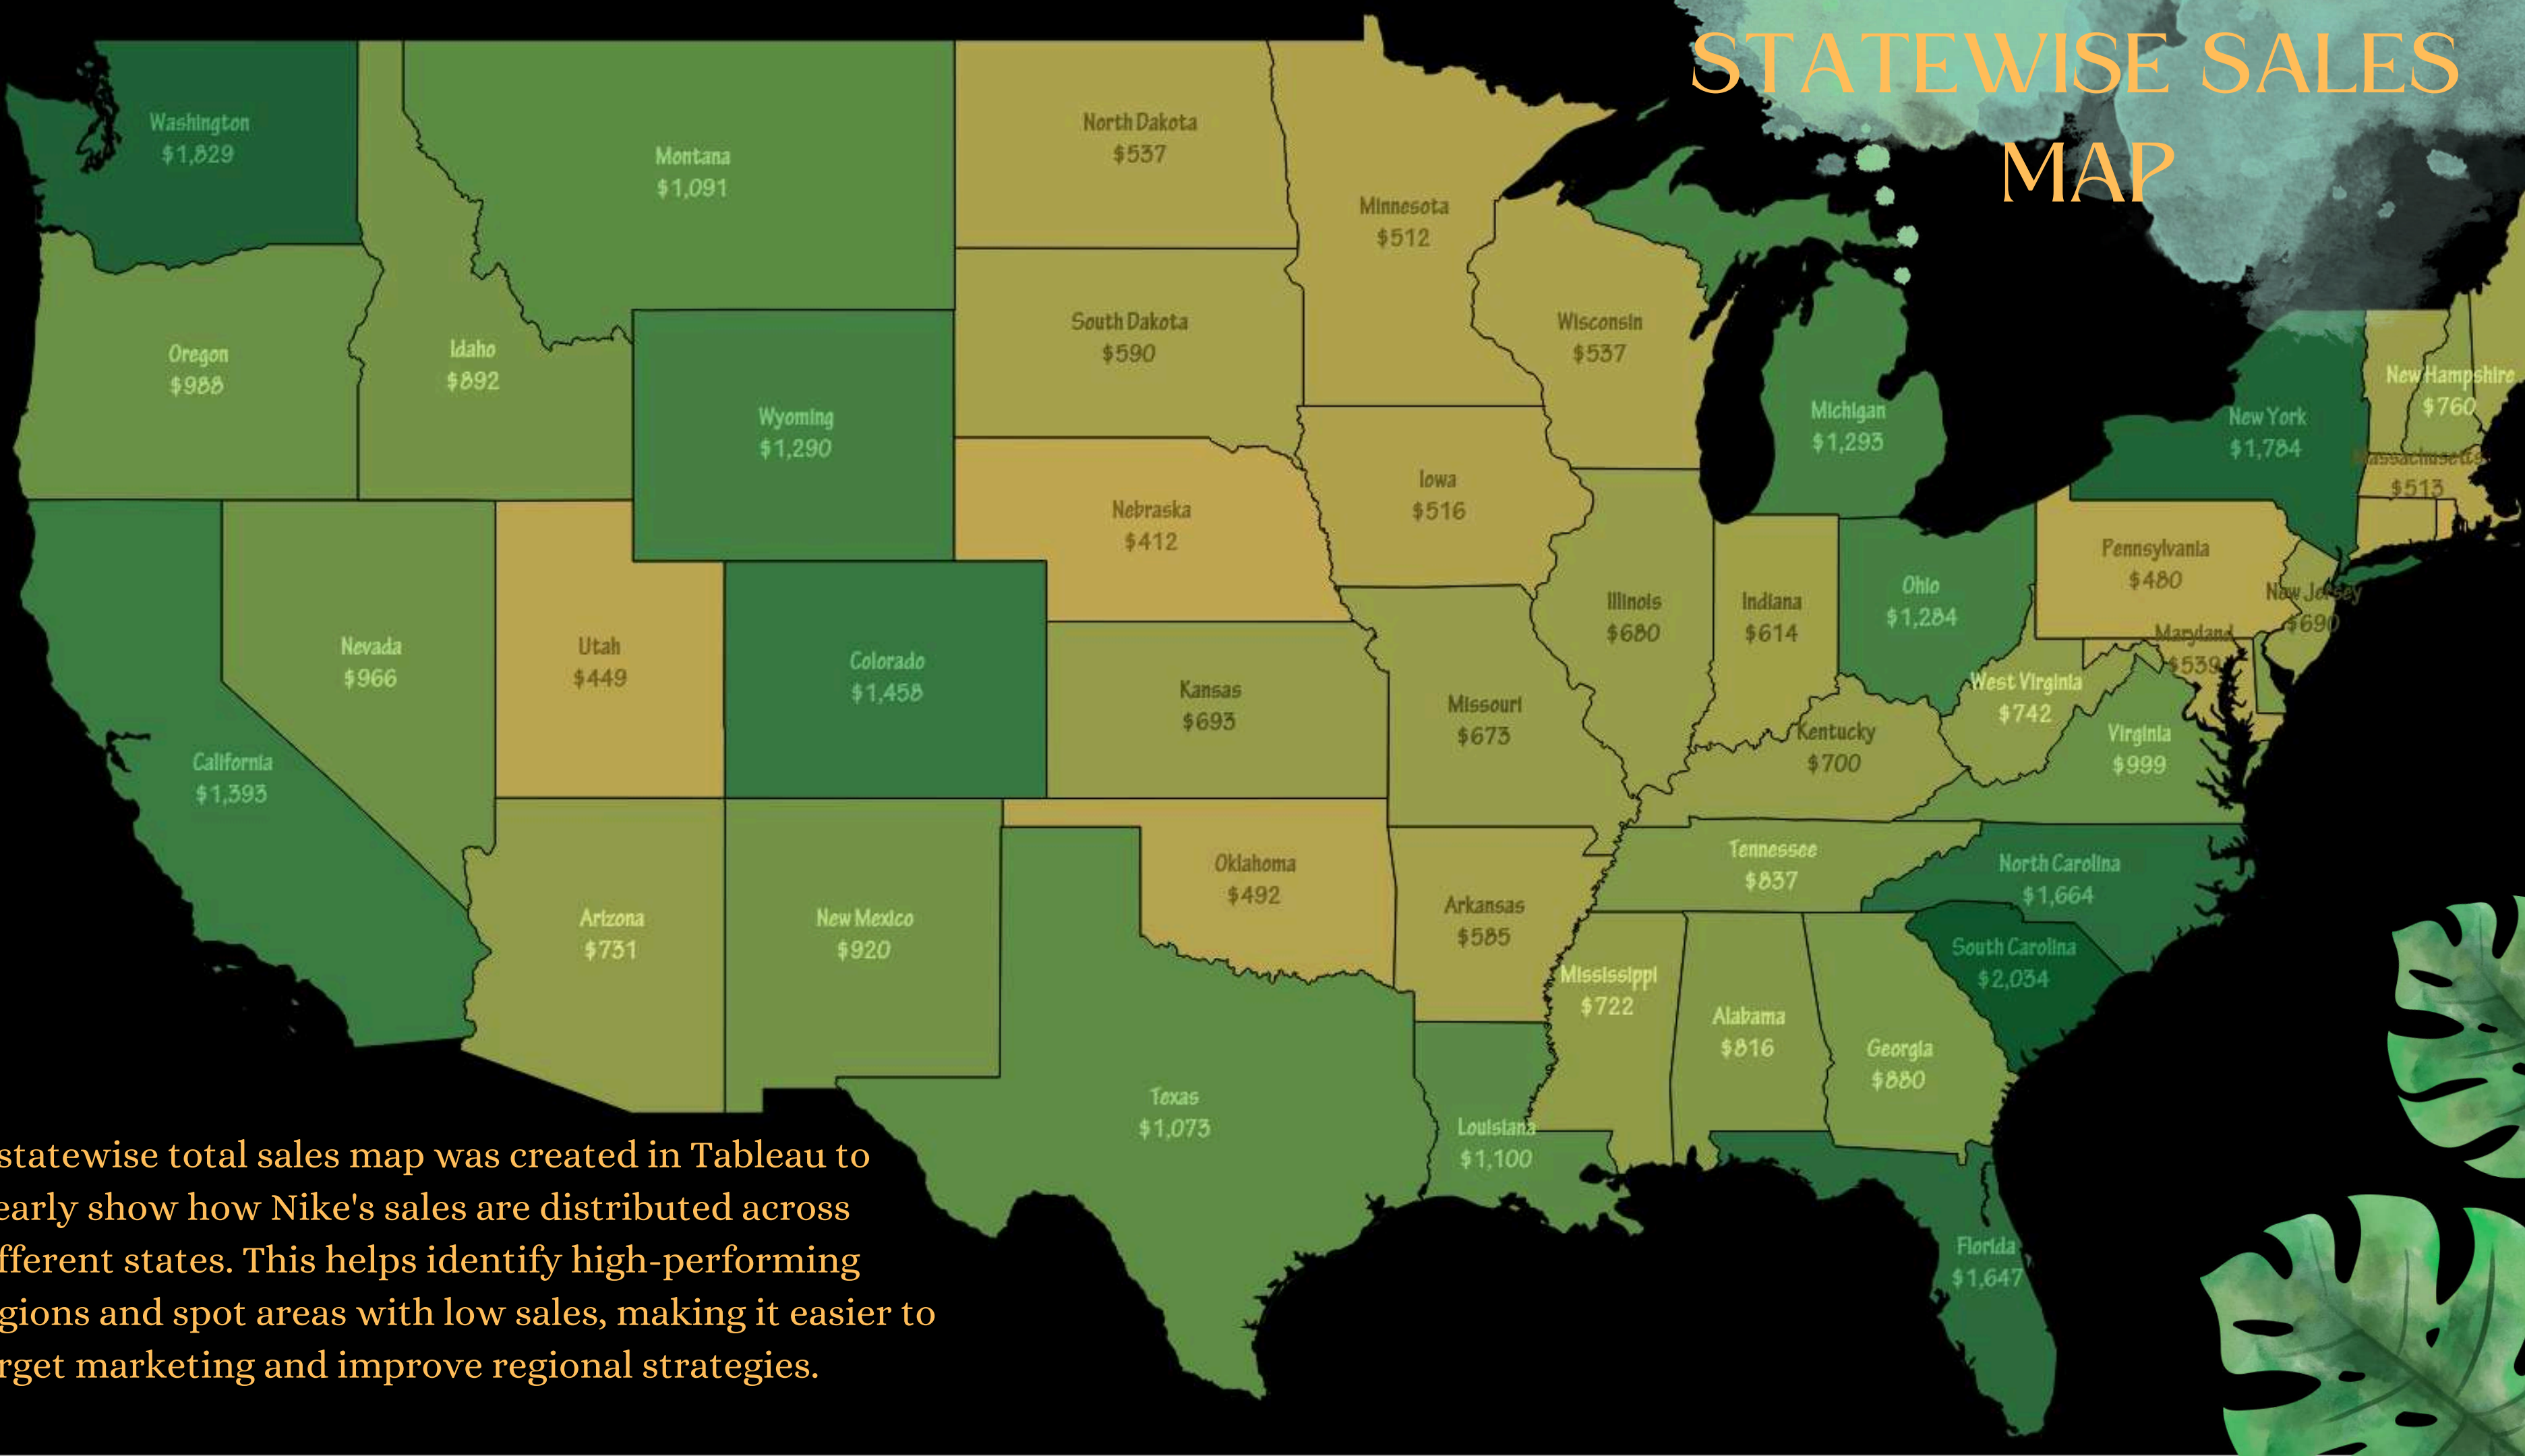

VISUALIZATION

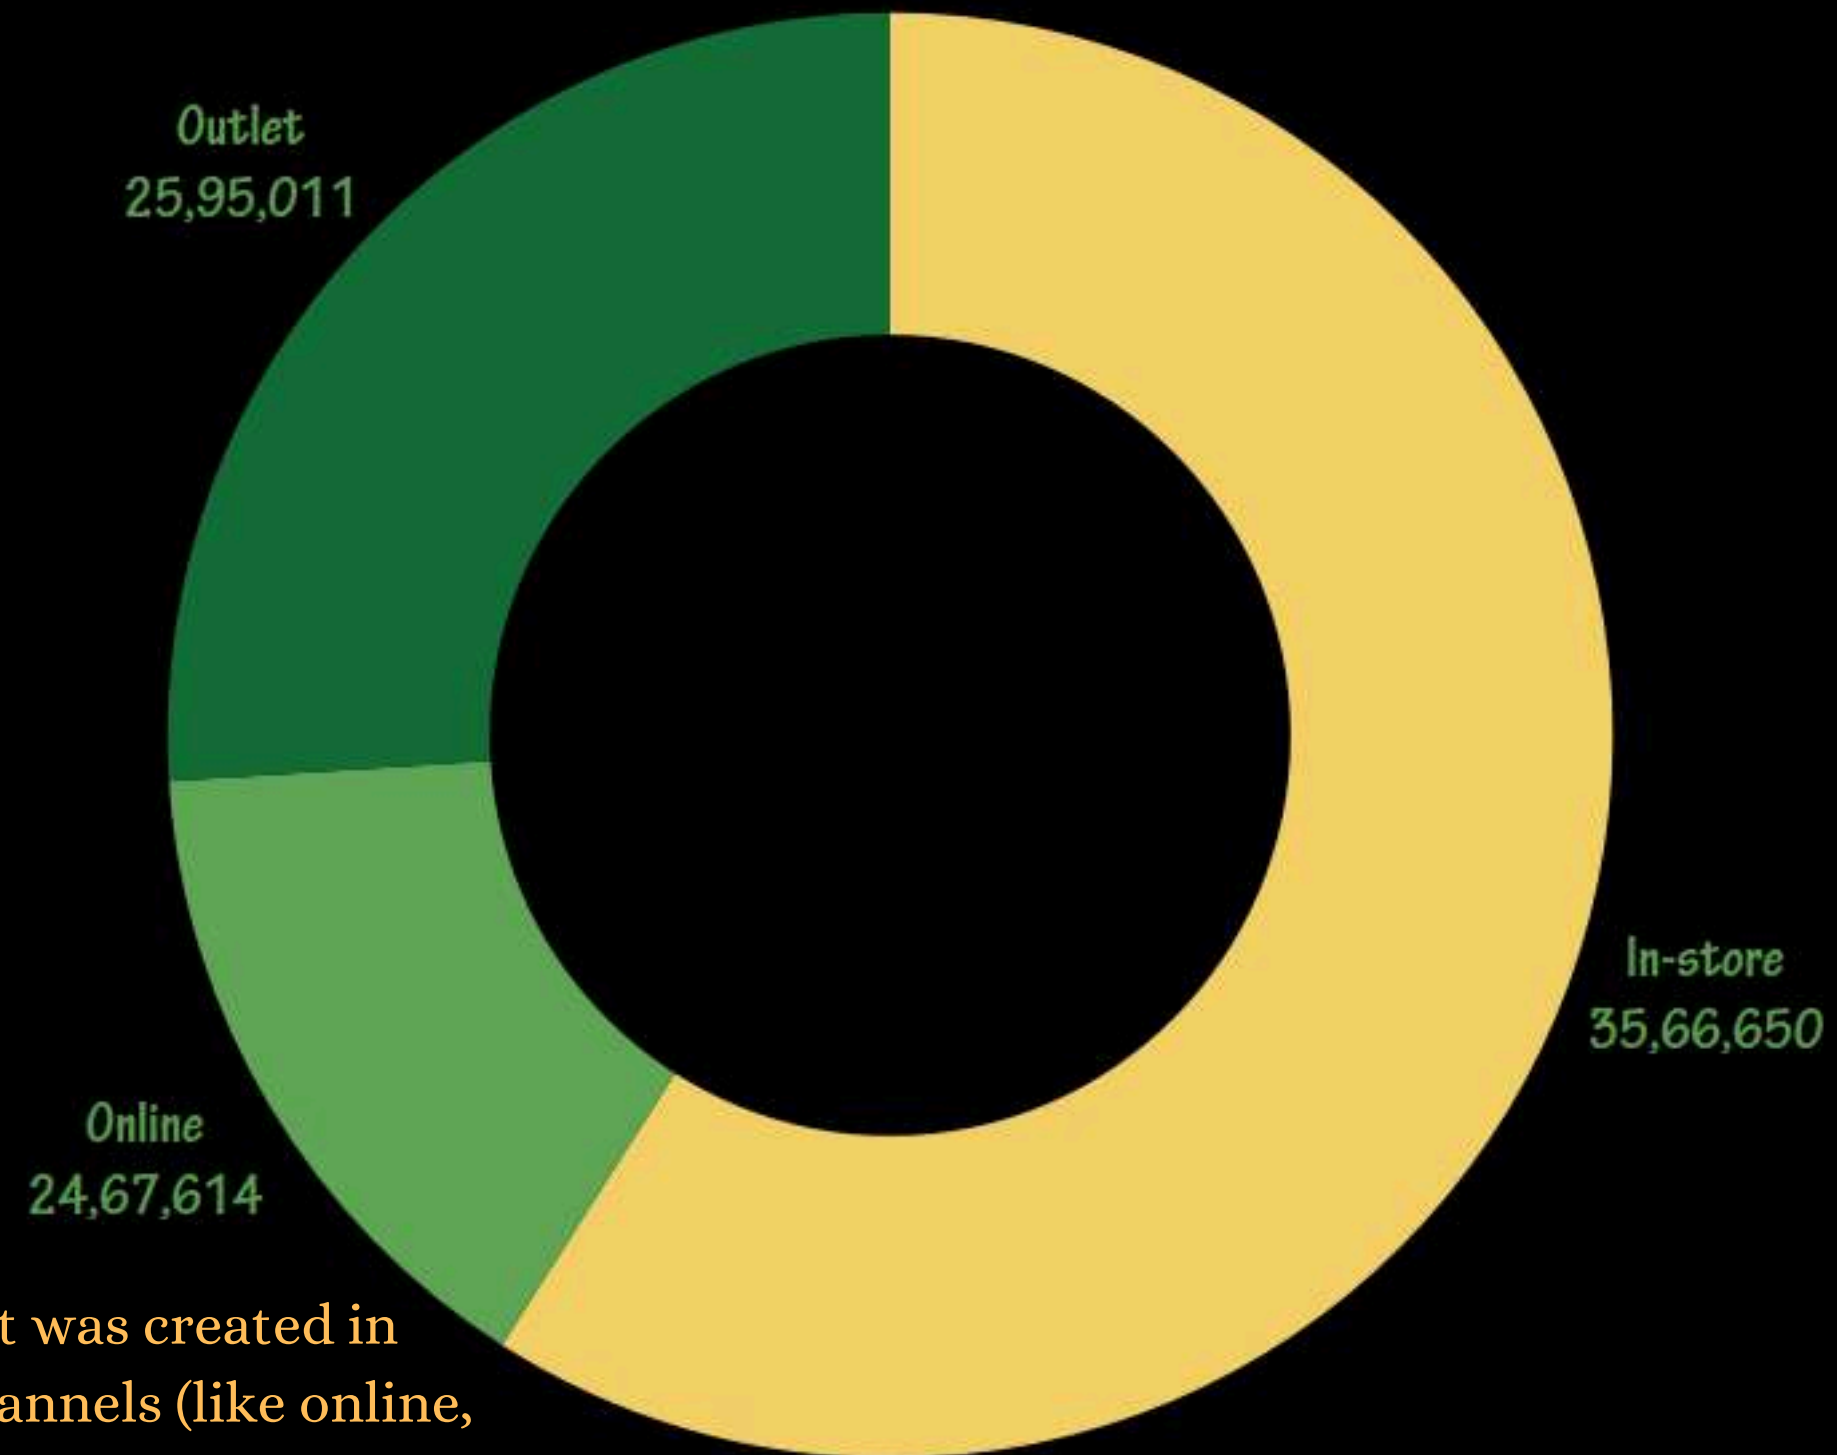

I USED TABLEAU TO VISUALIZE THE NIKE SALES DATASET TO UNDERSTAND SALES TRENDS, TOP-PERFORMING PRODUCTS, AND REGIONAL PERFORMANCE. BY CREATING CHARTS AND DASHBOARDS, THE DATA IS NOW EASIER TO EXPLORE AND SPOT PATTERNS.

STATEWISE SALES MAP

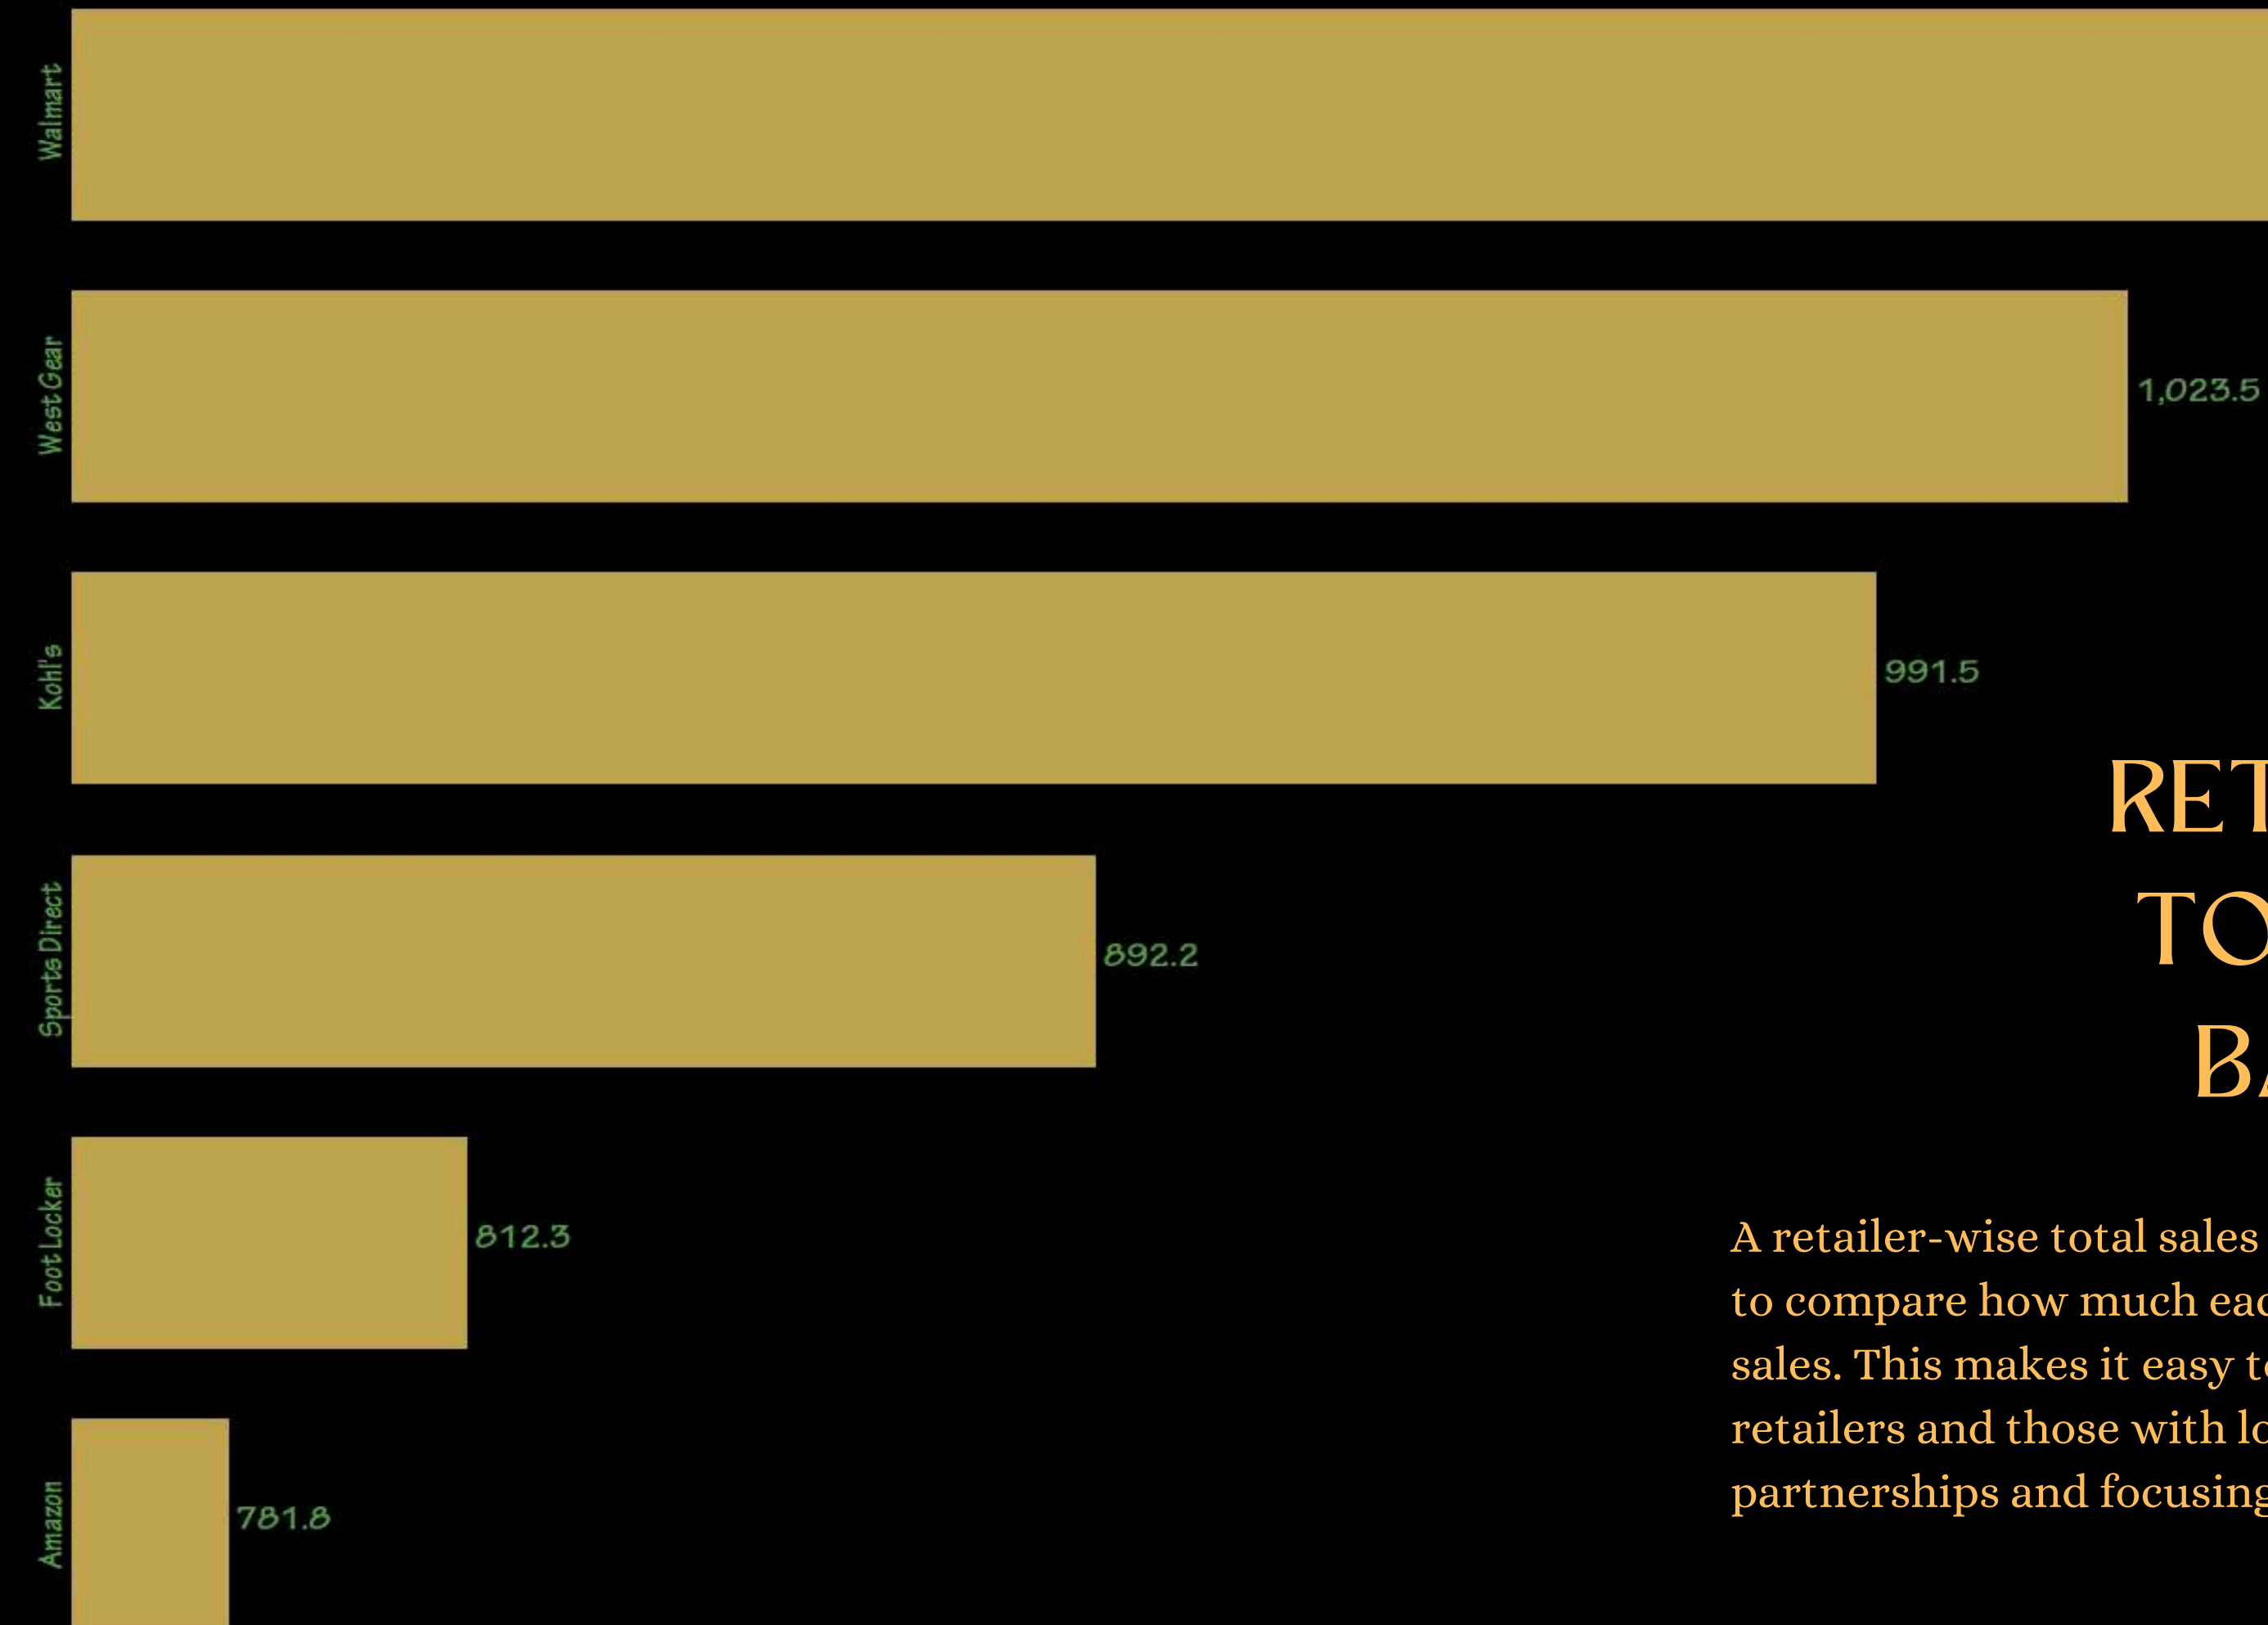

A statewise total sales map was created in Tableau to clearly show how Nike's sales are distributed across different states. This helps identify high-performing regions and spot areas with low sales, making it easier to target marketing and improve regional strategies.

SALES BY SALES MEHOD DOUGHNUT CHART

A sales by sales method doughnut chart was created in Tableau to show how different sales channels (like online, instore, outlet) contribute to total sales. It gives a quick and clear view of which methods are most effective, helping to guide future sales and marketing efforts.

RETAILER WISE TOTAL SALES

RETAILER WISE TOTAL SALES BAR CHART

A retailer-wise total sales bar chart was created in Tableau to compare how much each retailer contributes to overall sales. This makes it easy to identify top-performing retailers and those with lower sales. It helps in evaluating partnerships and focusing on the most profitable channels.

PROFIT BY STATE BUBBLE CHART

A profit by state bubble chart was created in Tableau to show how much profit is made in each state using bubble size for comparison. This visual makes it easy to spot high and low profit areas at a glance. It helps guide regional strategies and resource allocation.

UNITS SOLD AND TOTAL SALES TREND

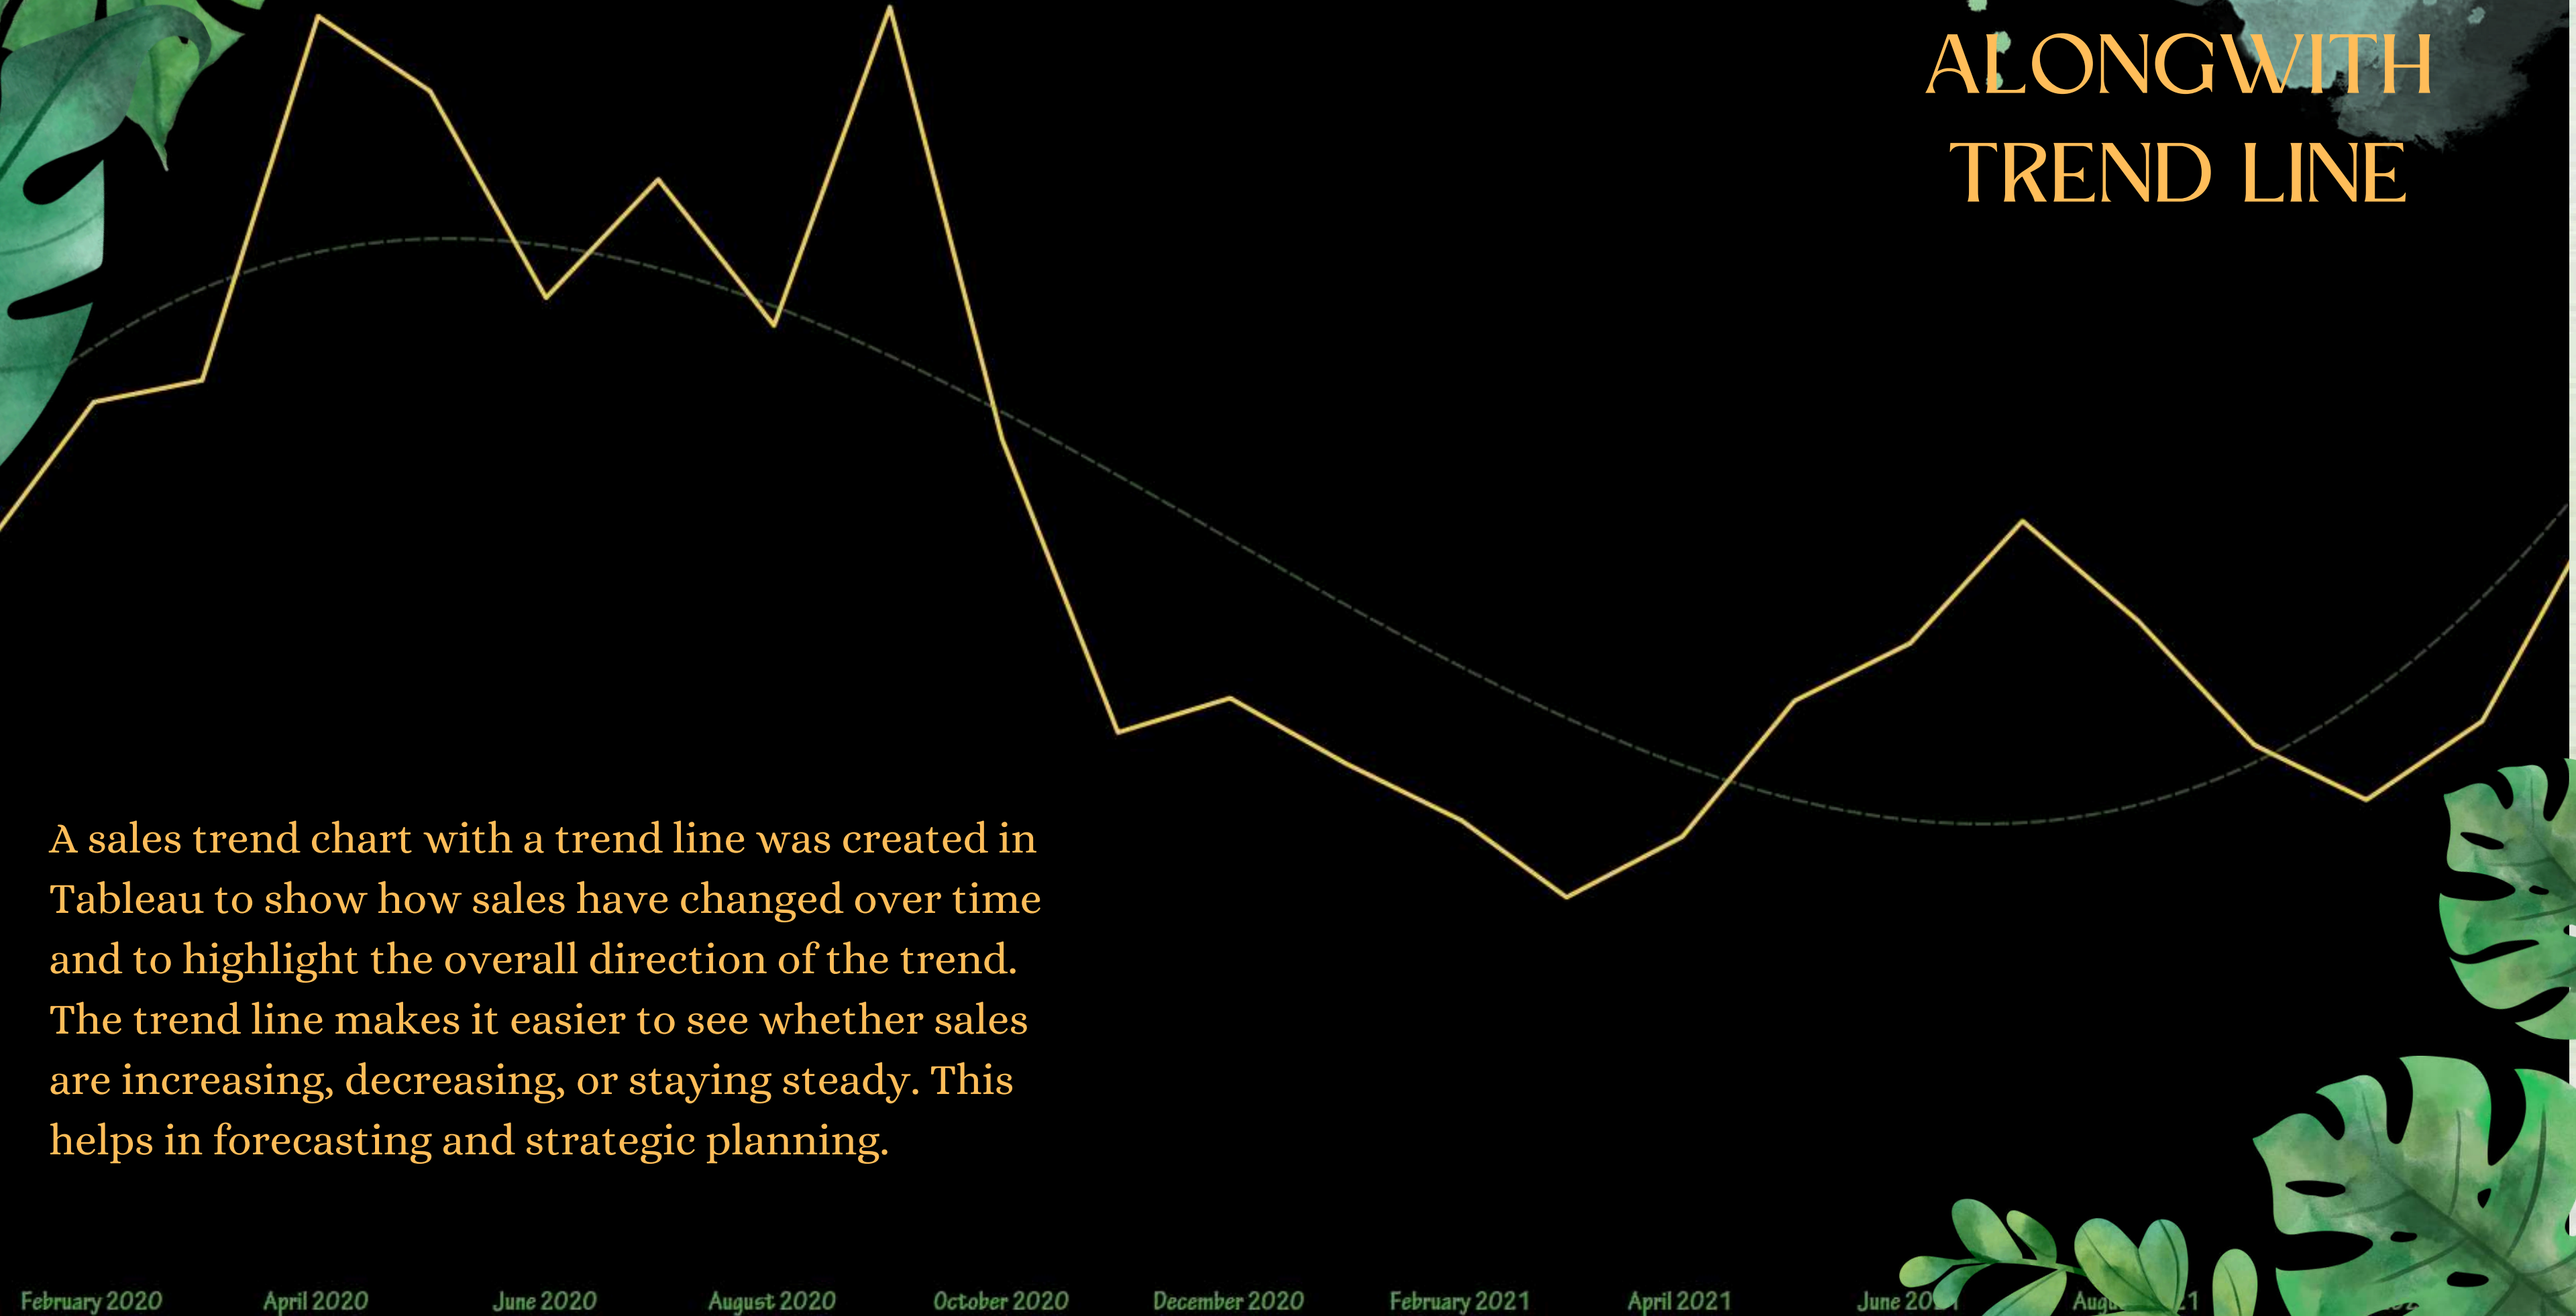

A units sold and sales trend chart was created in Tableau to visualize how both sales revenue and the number of units sold change over time. This helps to detect spot trends, seasonal patterns, and shifts in performance. A tooltip was also enabled to give detailed information when hovering over data points, making the chart more interactive and informative.

TOOL
TIP

SALES TREND

SALES TREND ALONGWITH TREND LINE

A sales trend chart with a trend line was created in Tableau to show how sales have changed over time and to highlight the overall direction of the trend. The trend line makes it easier to see whether sales are increasing, decreasing, or staying steady. This helps in forecasting and strategic planning.

DASHBOARD

TWO DASHBOARDS HAVE BEEN CREATED, ONE OF THEM IS THE SALES DASHBOARD AND THE OTHER ONE IS THE TREND DASHBOARD. A NAVIGATION MENU HAS BEEN INCLUDED IN BOTH OF THE DASHBOARDS SO AS TO FREELY MOVE FROM ONE DASHBOARD TO ANOTHER. FILTERS, A CALCULATED FIELD(PROFIT), CARDS SHOWING THE TOTALS HAVE ALSO BEEN INCLUDED IN THE DASHBOARD.

The image features a black background with watercolor-style illustrations of green foliage in the corners. In the top-left, there are large, dark green leaves with prominent veins. In the top-right, there are smaller, lighter green leaves and a cluster of small white flowers. In the bottom-left, there are more small green leaves. In the bottom-right, there are large, dark green leaves with prominent veins, similar to the top-left. The text "THANK YOU" is centered in a large, orange, serif font.

THANK
YOU
